-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 11-13 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Trull (US 5,947,929).

Claims 1 and 13: Trull discloses in Figures 2 and 4 an injector comprising a housing (60) and a drive member (40) comprising a retaining member and outwardly extending flange member; a syringe (10) comprising a body and a plunger (24) comprising a wall/base member (80) having an outer surface (82) and inner surface (80) defining a retaining shoulder (86) and inwardly projecting flanges/connection members (30) which are fixedly disposed on the retaining shoulder and spaced along the inner surface of the cylindrical wall; wherein at least one retaining member on the drive member is adapted to engage with the retaining shoulder to enable the drive member to retract the plunger; and wherein the inwardly projecting flanges are adapted to engage the engaging flange members on the drive when the syringe is rotated about its longitudinal axis operable to cause the retaining member to disengage the retaining shoulder (column 6, lines 46-56).

Claims 12 and 16: Trull discloses in Figure 4 the plurality of flanges spaced evenly, radially, and longitudinally along the wall

Art Unit: 3767

Claim 11: Trull discloses in Figure 11 the interior surface of the wall defining a retaining shoulder formed on an axial plane and the plurality of inwardly projecting flanges radially spaced along the interior surface of the wall and extending in a longitudinal direction proximal to the retaining shoulder.

Response to Arguments

Applicant's arguments filed 7/10/2007 have been fully considered but they are not persuasive. Examiner considers part 80 of the plunger (24) to be the inner wall, which as seen in Figure 6, has what can clearly be considered a retaining shoulder, 86. It is from this shoulder and the inner wall from which the inwardly projecting flanges (96 in figure 6) project.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
